www.sensorfloats.com

We are ““SENSOR TEAM” DZZD. and our primary goal is producing fishing floats of all types and for most weather conditions. Having traditions and experience for more than 25 years of development, position us a lether in the branch.

We use high quality balsa wood for our floats. Also we offer a wide variety of readymade rigs. Our floats are proven to be the most attractive and reliable product on the market in Bulgaria.

Moreover, evry single float we invert is being thoroughly tested by competition fishermen in real fishing environment.

The feedback we receive is outstanding!

Most of the reasons for achieving these high results is that our floats can be used long time without swowing any cracks, discoloration and change in their weight, like in other brands! Today with a solid experence in the practice we have reched a level of high qulity and large production volumes.

We are producing fishing floats for Bulgaria, Germany, France, Spain, Portugal, Russia, Romania, Poland and other countries.

In the production of our floats we use onli top quality materials:

- Balsa with uniform and low density;
- High quality italian varnishes, created specifically for float produktion, meeting all the requirement for coverage, strenght, color depth and protection in different atmospheric conditions;
- Antennas: plastic - solid or hollow,glass or metal depending of the float type;
- Keels: fiberglass, carbon fiber, bamboo and metal. Keels can be with metal or plastic tips according to the client preference.

Every step of production is done under very strict quality control.

We produce a wide range of models aiming the general marker and the mass user, but also floats with specific features designed for professionals.

Over the years “SENSOR TEAM” DZZD. participated in the majority of the sport fishing races and events. We participated as competitors and sponsors also.

Beside the variety of float models we offer our costumers with custom models depending on their needs.

With best wishes for succesfull business from our team “SENSOR TEAM”!

“SENSOR TEAM” DZZD.
